

ISO 14001 Certification Portal

What is it?

A subscription based cloud solution to help manufacturing companies achieve and economically maintain ISO 14001 and other compliance driven certifications. It is uniquely designed to improve your overall operations and do it in a way that ensures conformance to ISO 14001 requirements.

What does it do?

- Helps in authoring, reviewing and maintaining documentation to achieve ISO 14001 Certification
- Ready-to-use digital file cabinets help in the storage, retrieval, archiving and version control of quality manuals, procedures and work instructions
- Built-in workflows help in document review, approval and release
- Helps in employee training and communication of procedure changes

Who can use it?

- Managers and Executives (dashboard to ensure compliance)
- Development teams, Quality staff, Document Control personnel, Supplier staff and Continuous Process Improvement teams
- Any manufacturing company that is building the capability to show compliance to ISO 14001

What problems it solves?

- **Document versioning** and control
- **Preventive action procedures** documentation and task driven reminders
- Records management and task driven reminders
- On-going **Quality certification maintenance**

How does it work?

- No software, No Hardware, No dedicated IT staff
- Works in conjunction with other existing IT systems or can act as the main system for small organizations
- Rapid deployment with unique proprietary implementation process
- Rapid customization to meet your needs—comes with templates.

Costs and Benefits

- No Capital or big upfront investment
- Pay as you go
- Productivity improvement guaranteed
- Solves your challenges relating to tasks, processes, documents, compliance, productivity analysis. etc.
- Deploys in Days

How to get started?
